PoWP - jQuery

1. Please download jQuery library and add references to it to the HTML file.
2. Please write a jQuery script, which will change the color of all *p* tags to blue and *div* tags to red after clicking the button with the *id* "changeColor".
3. Please write a jQuery script, which will change the color of all tags described by class "orange" to orange after clicking the button with the *id* "changeColor".
4. Please write a jQuery script that will be responsible for adding items to the list (*ul*, *li* tags). The script should be executed by buttons. Script should take the text of a list item from a text box, and add it to the beginning or end of the list (depending on which button was clicked).
5. Please write a jQuery script that will be responsible for inserting a *div* tag containing a *p* tag with any text before *div* tag with the id "myDiv".
6. Please write a jQuery script that will be responsible for adding a class related to a certain style to the last *p* tag on the page.
7. Please add a border to the *div* tag which is the parent of the *p* tag with id "myTag".
8. Please change the color of all tags located on the same level in the document tree as the *h1* tag, located within the *div* tag.
9. Please test how standard jQuery animations (Hide/Show, Fade, Slide) work. They should be used to display the menu of the website..
10. Please test how the *Animate* function works. Create an animation that moves the *div* tag and increases the size of its text.
